Many Cars Pass Gate Rocky Mountain Park

Cars passed through the Rocky Mountain Park during the past season in greater numbers than ever before, it was announced this week by Arthur L. Ford, acting associate superintendent, Banff.

Figures showing the number of cars which passed through the Kananaskis Gateway during the period from April 1 to October 31, inclusive, were given out by Mr. Ford as follows:

West bound - 35,576
East bound - 34,180

Total - 69,756

Occupants of these cars were 129,369 Canadians and 6,757 Americans.

Heard About Town

Lionel and Asa Senechal left last week for Seattle, where they will spend the winter with the family.

Mr. and Mrs. T. O. Stephenson, of Oyen, visited at the home of Mr. and Mrs. Wm. Milligan on Sunday.

The Tuxis Boys, with their leader, Mr. Evans, had a supper on Wednesday evening at the Acadia Cafe.

L. Brosteaux, of the Cereal district, was married in Calgary on November 14 to Miss Beatrice Maud Harber.

The Ladies' Aid wish to thank those who kindly gave so much of their time and did so much to make their concert a real success.

Mr. and Mrs. C. Hoblen and Mr. and Mrs. Clarence Peterson left on Friday of last week by motor for Lunenburg, Huxley and Olds.

Miss Mamie Reynolds, of Saskatoon spent the Thanksgiving holidays at the home of her mother, Mrs. Agar, of the Cereal district.

Mrs. J. B. Johnson, of Edmonton, who has been visiting for the past three weeks with the J. G. Connell family, returned home on Wednesday.

Some changes have been made in the train schedule on this branch of the C.N.R. The west bound train now leaves at 1.43. It was formerly 1.37. The east bound train leaves at 2.18. It was formerly 2.39. The train now meets at Dobson in stead of Youngstown.

Word was received here on Tuesday afternoon, Nov. 19th, that Mr. John Jones, of Wastina, died instantly, at Hemaruka, six miles from his home. It is supposed that he died from heart trouble. We have been unable to ascertain full particulars, which we will give in next week's issue.

The ship Discovery has left Cardiff, Wales, on the first stage of her Antarctic expedition which is being financed in Australia.

RED CROSS COLUMN

THAT DRY WELL

The human body can live without food for six or seven days if there is plenty of water to drink, but it will not live three days if deprived of food and water. Water is essential to the proper growth of the body and to its proper functioning. Not just water, but pure water, is a necessity.

We have finished one of the

Bill Sutherland's Trial Hanna Next Monday

Constable Shaw, of Youngstown, was in Chinook Tuesday subpoenaing witnesses in the trial of Bill Sutherland, which takes place at Hanna on Monday, November 25. The police believe they have woven a strong chain of evidence around the accused, and expect a conviction.

Many from here will attend the trial.

Report of Preliminary Hearing

(Crowded out last week). The following is a copy of the records at the preliminary hearing of William Sutherland, accused of assisting a bandit to escape, before Police Magistrate Gilchrist at Youngstown on November 8.

W. A. Hurley described the hold-up on October 25.

Harman Vanhook described seeing bandit come out of store while hauling water. He afterwards identified bandit in the hotel.

Mrs. Vanhook testified having seen bandit going west and Sutherland went a few minutes later in same direction.

Lloyd Robinson, who saw both bandit and Sutherland standing together by car in which bandit escaped in.

Bob Vanhook testified having seen bandit and Sutherland together on one occasion at Acadia Hotel.

J. Peyton testified selling parts for Ford car to Sutherland on morning of hold-up.

Roy Mart testified to bandit and Sutherland eating supper together.

Leonard Bayley testified they registered in a room together on the 17th.

Dan McLennan testified that Joe Kelly stayed with his stepson, Sutherland, at his place.

John McLennan testified that he saw Kelly and Sutherland together the evening before the robbery.

Constable Shaw said Sutherland told him that he had sent money for Kelly to come up here from the States.

Accused had nothing to say. Accused remanded for trial at next sitting of competent criminal jurisdiction at Hanna on November 25.

driest seasons for many years. Sloughs and creeks are dry all over the province. Wells are either very low or quite dry. Under those conditions water has to be used from where it can be found, irrespective of whether it is known to be pure or not. Already several cases of typhoid fever have been admitted to city hospitals from country points. Typhoid is a water born disease.

Again when moisture in any quantity does come, the well will fill and much of the water will be surface water—always dirty and impure. Before using water from an untested source, boil and chlorinate it. Before using the newly filled well water, boil and chlorinate and send a sample to the health department to be tested. It is worth it, and costs much less than six weeks in a hospital with typhoid fever or dysentery.

Literature on wells and the chlorination of water may be had free from the Canadian Red Cross Society, 407 Civic Block, Edmonton.

"SALADA" TEA

'Fresh from the gardens'

This Better Age

The work of a clever cartoonist has for some time past been syndicated to newspapers in America, under the general title "So This Is Progress," wherein he depicts by way of contrast conditions of fifty or more years ago with those of today, as, for example, a party of present-day tourists in a high powered motor car speeding at sixty miles an hour along a highway on which at every vantage point unsightly billboards invite you to chew this gum, smoke that cigar, or use such and such a soap. In contrast he presents the restfulness and beauty of a tramp through the woods, and by brooks, and rivers rambling through the countryside. The work of this cartoonist leads one to wonder sometimes whether the vaunted progress of this age of frenzied speed, amazing machinery, industrialized mass production, insane speculation is, after all, an advance upon the more leisurely life and enjoyments of the last century.

Such a picture is, however, one-sided, inasmuch as while it points out drawbacks of today, it fails to visualize the great achievements and gains to humanity as a whole, and already there is an awakening public opinion to the need for the preservation of beauty and leisure, and emphasis is laid on the fact that these need not necessarily be lost in order to make advancement in other directions.

Recently another artist presented two companion pictures in a single drawing which he labelled "This Is Progress." One picture was a reproduction of the famous painting "The Doctor," presenting the family physician by the bedside of a dying child in a workman's humble cottage, intently watching the child but apparently powerless to stave off the ravages of the disease which was slowly taking the life of the child before the eyes of the agonized parents. The companion picture revealed the medical scientist of today at work in his laboratory with his scientific instruments locating and studying those deadly germs and bacilli which, it is now recognized, are the cause of disease. This was war waged not on disease after it claims its victim, but on the cause of disease. This is progress, and a truer, because a more lasting picture of the achievements of the twentieth century.

Despite all the noise, the killing pace, even the ugliness of this mechanized age, with its drawbacks in the merging of the individual within the cog of a huge industrial machine, and the increasing worship of the "mighty dollar," the standard of living is rising higher and higher, and beauty lost in one way is found and multiplied in countless other ways. The average workman in our cities and manufacturing towns is now better paid, better dressed, better housed, better fed, and, work'ng shorter hours than under more sanitary conditions, has more time for leisure and recreation than in any previous period in the world's history. His children are enjoying advantages in education and opportunities in life he never had in his youth.

The riches of the world's best literature, formerly reserved for the favored few, are available at low cost through the modern printing press for every home. The beauties of the world's finest music are no longer reserved for the rich and the gifted, but are broadcast by radio to be captured in millions of homes, no matter how isolated they may be. In the last century the man w'at a horse and buggy for pleasure or business belonged to the select; today the man without a motor car is the exception, not the rule. The telephone is an instant call in the humblest home, even the pioneer settler's sod shack, and the radio is in the mining prospector's cabin.

Even the toil and drudgery of the farm are disappearing with the advent of power machinery and electricity. Soon, even in this last Great West, high power transmission lines will carry electricity into the farm home to bake and cook, chop feed, operate the churn, pump water, and perform numerous other tasks. Even in advance of this, small gasoline engines now do the work on many farms. The telephone, the radio, the motor car and better roads, have already well-nigh annihilated the loneliness of farm life, while educational facilities and medical services are no longer remote.

So, notwithstanding certain drawbacks and losses, the world advances, progress is real and altogether worthwhile, life becomes richer and fuller, mankind rises higher and higher as God and nature designed that he should.

Coins Within a Coin

Quant Old Silver Pieces Were Made To Fool Highwaymen

I was shown the other day a curious coin which was given to a friend of mine by a collector. It is an Austrian silver piece, about the size of a crown, dated 1814, and it had been in my friend's possession some time before it was discovered that it rattled. Investigation showed that it had been made into a box of which the lid screwed down, and inside were two large pieces of King James I. I am told that such silver pieces were used as a means of carrying a small supply of gold, the idea being that many highwaymen only troubled to take gold from their victims, leaving the more bulky silver behind.

Japan is said to have had no written language until about 236 A.D.

KEEP TRAFFIC MOVING

Pompeii never had traffic problems. In the human system, as in modern cities, the great need is to keep the traffic moving. A slight stoppage may cause very serious consequences.

The road to health in the human body--the intestine--is 32 feet long. Think how easy it is for this long tube to become clogged. Think how essential it is to keep it healthy and active.

You cannot allow by saying "I cannot go because I have a sick headache." You cannot plead indigestion or biliousness or constipation. It simply isn't done. You cannot confess that you are a victim of self poisoning from half digested food lying in the intestine, decaying and generating poisons which bedevil the eye, blotch the skin and stupefy the brain. Don't put off or delay. Take a little friendly aid from CARTER'S LITTLE LIVER PILLS. Red Packages all druggists 25c.

Ship Foxes To Sweden

Large Shipment Leaves Western Canada For Swedish Port

One of the largest shipments of silver and black foxes to be exported from Western Canada left Winnipeg recently by Canadian National Express for Halifax, where they will be placed on board the S.S. Kungsholm, which sails for Gothenburg, Sweden. Valued at close to \$370,000, the 297 pedigreed silver and black foxes were crated and carefully packed in two specially-equipped Canadian National express cars for their long journey to the seaboard.

One hundred and twenty-five of the foxes were supplied by the B.C. Crompton ranch at Quilchena, British Columbia, while the remainder of the shipment are from the All Star Ranch and the Winnipeg Fox Company, both of Winnipeg, Sweden has been one of the largest importers of Canadian-bred silver and black foxes, but in the past the animals have been secured largely in Prince Edward Island and other eastern ranches. During their journey, the foxes will be under the care of M. Holmin and Nils Kimrich, partners of the Swedish importing firm.

On the completion of the new Canadian National Railways hotel at Halifax, passengers will be able to leave their trains, enter the hotel and board a trans-Atlantic steamer without once having to go out from under a roof.

International Amity

Ramsay MacDonald Says That Peace Plan Cannot Fail

The unanimity of the British people for international amity will prevent defeat of the naval disarmament proposals. Premier J. Ramsay MacDonald said at Leicester, England, in resolving the freedom of the city. Referring to his American trip, MacDonald said:

"The journey was made successful, not by anything I did, but what the people of the country did. There are no parties in Britain. It is united, both in prayers and hopes. I feel that such tremendous moral backing cannot possibly be defeated."

"I was on a mission of good will—a mission not only to promote active good will between the United States and Britain, but I hope and pray, a good will that will spread healing and inspiring arms around the earth."

HOUSEHOLD CARES

Fall Heavily On The Woman Who Is Run Down—Thin Blood the Trouble

To the woman who has her household to do and her family to attend to, illness is almost a calamity. Many a woman keeps on with her household duties when she is feeling ready to drop. Her head aches, she may be breathless at the least exertion, she has little relief for food, and always feels tired and nervous. The trouble is poor blood—thin, watery blood, and she badly needs the health help that only Dr. Williams' Pink Pills can give her. The rich, red blood which comes through the use of these pills promptly restores anemic sufferers to good health. Among the thousands who have found new health through the use of this medicine is Mrs. John W. MacDonald, Cardigan, P.E.I., who says:—"I can most strongly recommend Dr. Williams' Pink Pills. I was so run down in health that I was unable to do my household work. My husband thought I would never get better, as I had tried different kinds of medicine, with no benefit whatever. I bought and took Dr. Williams' Pink Pills, which I did, and to my joy I found they were just the thing I needed. I took six boxes of the pills and found myself restored to my old-time good health."

"Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, nervousness. Take them as a tonic if you are not in the best physical condition and cultivate resistance that will keep you well and strong. Get a box from the nearest drug store and begin the treatment now, or you can get the pills by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

To Attract Tourists

Yokohama plans an effort to compete with Shanghai for the title of "Paris of the Orient." As a first step in the scheme to attract more tourists, trade to Japanese port city, Mayor C. Aoyama proposes to construct a large theatre and cabaret. Other night life attractions would be added. Tourists are now prone to stop in Shanghai, which is famed over the world for the gaiety of its cafes and dance halls, which contribute greatly to the wealth of that city.

No matter how deep-rooted the corn may be, it must yield to Holway's Corn Remover if used as directed.

Women of the Samoan Islands regard a shiny face as a mark of beauty.

Women of the Samoan Islands regard a shiny face as a mark of beauty. Railway Earnings Decline

A Decrease In Gross Revenues Shown For August

Canadian railways showed a decrease in gross revenues for August in comparison with 1928 revenues of \$2,815,117, and, with an increase in operating expenses of \$101,704, net operating revenues were reduced by \$2,916,892.

The big reduction in freight traffic was in long haul freight, principally grain. The tons of freight showed an increase of 2.2 per cent., but the shorter haul of 212.9 miles, as against an average of 224.1 miles for August, 1928, reduced the ton miles by 2.9 per cent., and freight revenues were less by \$2,173,551, or 6.8 per cent.

Passenger traffic was lighter than in 1928 by 21.3 per cent., and passenger revenues decreased by \$980,131, or 10.1 per cent., but passenger train miles were reduced only 2.7 per cent., and passenger train car miles were reduced by 6.9 per cent. The average freight haul decreased by 11.9 miles and the average passenger journey decreased by 17 miles.

For the eight months, January-August, gross revenues amounted to \$34,744,618 as against \$33,777,933 in 1928, but net operating revenues were less than in 1928 by \$59,995.

Aeroplane Development

Army Transport 'Plane Operated Without a Pilot

Development of the gyroscope for use in keeping aeroplanes on their true courses without directional guidance has progressed to such a point that 'planes have been operated for long distances without the guiding hand of a pilot at the stick, Wright sold army engineers' announced at Dayton, Ohio.

The latest and most successful of these experiments was conducted recently, when an army transport 'plane was flown from Wright field to Detroit carrying five passengers and with no pilot in the cockpit.

Fersian Balm the creator and preserver of beautiful complexions. Tonic in effect and wonderfully stimulating, Safeguards and beautifies the most delicate textured skin. Cleanses and relieves all skins flushed or irritated by weather conditions. Magical in its effect. A little gentle rubbing and a youthful freshness and fairness is instantly created. Invaluable for softening the hands and making them flawlessly white. Truly the perfect toilet requisite for the woman who cares.

Will Preserve Old Fort

Changes At Churchill May Necessitate Guard On Fort Prince Of Wales

That it might prove necessary to place a guard over the ruins of the two-century-old Fort Prince of Wales at Churchill, was the statement made by Hon. Charles Dunning, Canadian Minister of Railways, on his return from a trip of inspection over the lines of the recently constructed Hudson Bay Railway to Canada's Arctic port.

Two hundred years ago, occupants of this center of the Hudson's Bay Company's activities carved their names on the rock walls. Now with the steady increase of visitors to Fort Churchill, the walls at the old Fort are being marked up by new names despite the desire of the Department of the Interior to preserve the ruins as the pioneers of the north left them. "I imagine the department will put guards over the fort," Mr. Dunning said. "It is perhaps the most interesting relic left to us of early Canadian history, a history that pre-dated that of any city on the prairies or the middle United States. Churchill was Churchill and the capital of the western half of the continent from the Arctic Sea to Oregon before there was any Saultier, or Fort Garry, or Regina. The Fort stands as a monument to the men who built it as a link with the 18th century in this country and must be preserved."

Most people believe in law and order and as long as they can lay down the law and give the orders.

When things do not come your way it is a sign you ought to be going after it a sign.

Stop falling hair with Minard's Liniment.

Ambassador Bridge

Now In Operation

Longest Suspension Bridge In World Between Canada and United States

A great new link between Canada and the United States, the Ambassador Bridge, has come into operation. The ever-growing traffic between the two countries brings into being the longest suspension bridge in the world—the Ambassador is 1,850 feet long between the main towers. The centre span looms 152 feet above the waters of the Detroit River and at the piers is 135 feet above the water. The total length of the bridge from the terminal in Sandwich, Ontario to the terminal in Detroit is nearly two miles.

The roadway of the bridge is 47 feet wide, providing five lanes of traffic, flanked by an eight-foot sidewalk. These lanes for traffic will be used in either direction as circumstances demand. Main towers of the bridge are 365 feet in height and of steel construction.

The magnitude of the structure is indicated by the quantities of different kinds of material used. Structural steel and cable wire weight approximately 24,000 tons; concrete masonry measures 25,000 cubic feet, cement used totalled 40,000 barrels; the roadway pavement is 60,000 square yards, sidewalk 8,000 square yards. Two million rivets were used in the construction of the steel portions of the bridge.

Proposals for some direct connection across the Detroit River have been made for nearly fifty years. Work was started on the Canadian end in June, 1927, and the American end, a month previous.

Acids in Stomach Cause Indigestion

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach. The defective stomach lining is irritated, digestion is delayed and food, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try taking aside all digestive aids and instead get from your druggist some Bismarck Mucosa and take a little in water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no nausea, gas or pain. Bismarck Mucosa (or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of mucosa for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Records From Slot Machines

Those who enjoy hearing their voices, may do so by dropping a coin in a slot machine, which is to appear in London streets. It is operated on the phonograph principle. The voice is registered on a thin disc of red metal alloy, of secret composition, which is delivered five seconds after the speaking is finished. It can be used on a phonograph, and with any three needle. The record is guaranteed to be permanent.

Needless Pain!

People are often too patient with pain. Suffering when there is no need to suffer. Shopping with a head that throbs. Working though they ache all over. And Aspirin would bring them immediate relief!

The best time to take Aspirin is the very moment you first feel the pain. Why postpone relief until the pain has reached its height? Why hesitate to take anything so harmless?

Read the proven directions for checking colds, easing a sore throat; relieving headaches and the pains of neuralgia, neuritis, rheumatism, etc.

You can always count on its quick comfort. But if pain is so frequent recurrence see a doctor as to its cause.

ASPIRIN
TRADE MARK REG.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful! I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."

—Mrs. Milton McMullen, Vancouver, Ontario.

WANT COPY OF PEACE PACT IN EVERY SCHOOL

Winnipeg—Proposals to have a copy of the Briand-Kellogg peace pact placed in every school in the Dominion, which have been endorsed by Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, are meeting with the approval of educationists in the western provinces and will be considered by provincial governments as soon as formal notification of the project is received.

Under the plan, the federal government would furnish suitable copies of the peace pact for use in the schools, but as school administration is a provincial matter, the provincial governments would have to undertake the placing of the copies in the schools.

"I see no difficulty in carrying out such a plan," stated Hon. R. A. Hoey, Minister of Education for Manitoba, to the Canadian Press. "The government of Manitoba would be glad to co-operate, but it is a matter for the local school boards to decide."

Mr. Hoey said intimation would be sent to the various school boards in the province by his department, of copies being available and he thought most schools would avail themselves of the opportunity to secure a copy of the pact.

The British Columbia government will co-operate in the plan, it has been intimated by the minister of education for the coast province.

Speaking at Ocean Falls, B.C., recently, where he unveiled a copy of the pact in the United Church, Mr. King said he would like to see copies of the pact in all churches as well as schools.

Alberta Town Burned

Property Destroyed By Flames But No Lives Lost

Edmonton—Flamed by a driving wind which sprang up suddenly, a bush fire swept over and destroyed the thriving little town of Thorhild at an estimated loss of \$150,000. No lives were lost but several citizens suffered burns.

Practically all of the town's 200 inhabitants are homeless, many without clothing and all without food. The entire business section and all residences were burned. Thorhild is 53 miles north of Edmonton on the A. and G. W. line.

Awarded Big Contract

Regina Firm Will Erect Calgary's New Post Office

Ottawa.—The construction firm of Smith Brothers and Wilson, of Regina, Sask., have been awarded the contract for the erection of the new postoffice at Calgary, Alta., which is expected to cost approximately \$2,000,000 when completely equipped. The Regina firm won the contract with a tender for \$1,295,000. The postoffice will be eight stories in height, and will be given over wholly to the operations of the Canada postal services.

Universal Suffrage For Turkey

Angora, Turkey.—President Mustafa Kemal Pasha, who has taught his people how to write in Latin characters and adopt western manners, now believes they should all have the right to vote. His government submitted a bill in the National Assembly, which if passed, will make universal direct suffrage operate in the next legislative elections.

Storm Destroys Fishing Nets

London, Eng.—Six hundred vessels of the Scottish fishing fleet lost \$1,000 fishing nets in a gale off the east coast, it was revealed by Right Hon. Wm. Adamson, secretary of state for Scotland. To replace the nets would cost \$750,000 and most of them were not insured. There will be a marked shortage of fish for some time.

V.C.'s Guests At Windsor

London, Eng.—The Canadian winners of the Victoria Cross and a few others from overseas had an interesting day at Windsor, as guests of the British Empire Service League, Windsor Castle and most of its splendours were freely open for their inspection.

Failed To Open Safe

New York.—Eight armed men held up the officer of the day and naval policemen at the navy base in Brooklyn and after an unsuccessful attempt to open a safe containing \$80,000, escaped.

W. N. U. 1812

Decline In Grain Receipts

Vancouver, Montreal and Quebec Ports Show Great Reduction

Ottawa.—A decline of 112,731,253 bushels of grain is indicated in the receipts at the ports of Vancouver, Montreal and Quebec for the current year ending Nov. 6, compared with the figures for the corresponding period last year. At the same time deliveries from these ports dropped 102,895,627 bushels.

Total receipts at these Canadian ports amounted this year to 155,266,157 bushels, compared with 267,097,410 bushels for the same period of 1928; deliveries amounted to 153,088,840 bushels as against 261,556,467.

Fire Damages Seminary

Loss To Quebec Institution Estimated At Half a Million Dollars

Three Rivers, Que.—Fire swept through the oldest wing of St. Joseph's seminary, destroying that section of the institution which was erected in 1870 and was one of the best known classical institutions in the province. No lives were lost, although several of those caught in the building were taken out with difficulty. The damage was estimated at half a million dollars and the fire was the most destructive to strike this city in the last 20 years. Numerous valuable documents and books were destroyed.

Leaving Diplomatic Service

U.S. Minister To Canada Has Tendered His Resignation

Washington.—William Phillips has resigned as minister to Canada. Mr. Phillips, who is one of the leading United States diplomats, plans to quit the diplomatic service probably late next month and settle with his family in New England.

President Hoover accepted the resignation with great reluctance, and sought to induce Mr. Phillips to remain in the public service. However, the minister to Canada explained that he desired to leave office after many years in order to rear his family in the United States.

Message From King George

Conveyed Sympathy To Widow Of Hon. J. A. Robb

Valley Field, Que.—The sympathy of His Majesty King George, was conveyed to the widow of Hon. J. A. Robb in a message received by Lord Willington, Governor-General of Canada, and conveyed to Mrs. Robb.

"The King much regrets to hear of the death of the finance minister of the Dominion Government and asks that you convey the expression of His Majesty's sympathy to Mrs. Robb."

Seeking New Air Record

John H. Mears Will Attempt To Beat Zeppelin's Time

Chicago.—John Henry Mears, of New York, speaking here announced plans for a new attempt at the record for circling the earth now held by the Graf Zeppelin. Mears and the late Charles Collier, held the world's circling record until the Graf's flight. The new trip will be started next June, Mears said. The Pacific hop is to follow the path travelled by the Soviet fliers.

Stock Judging Competition

Winnipeg, Man.—Joseph Racine, Radisson, is one of the six students chosen to represent the Manitoba Agricultural College in stock judging competitions at the Toronto Royal and Chicago International Winter Fairs which will open respectively on November 19 and 30. Five men constitute a team. The others selected are: J. M. Downman, Alexander, Man.; Morgan Brooks, Winnipeg; John Connor, Deloraine, Man.; Walter Frazer, Beulah, Man.; and Earl Rasmussen, Wayne, Alta.

Russia's New Budget

Moscow.—Soviet Russia's budget for the coming year, details of which have been announced, shows the huge total of 11,300,000,000 roubles (about \$5,695,000,000) which is 45 per cent. more than last year, and the greatest in the history of the Soviet state. Large part of the state's revenue is expected to come from direct and indirect taxation. The sum of 245,000,000 roubles will be devoted to education, this being more than 60 per cent. above last year.

Premier Of Iraq Dead

Bagdad, Iraq.—Sir Abdul Munim, premier of Iraq, was found dead from bullet wounds recently. No explanation of the shooting has yet been made public.

Proposed Alaskan Highway

Representatives Of United States Confer With Premier King At Victoria

Victoria, B.C.—Appointment of a joint committee consisting of two United States and two Canadian representatives to thoroughly inquire into the proposed highway through British Columbia and the Yukon territory to Alaska, was mooted at a conference held here between Premier Mackenzie King, Premier S. F. Tolmie, and United States representatives, including Major Malcolm Elliott, president of the Alaska roads commission, and members of the Seattle Chamber of Commerce.

The need for a thorough investigation of all angles of the project was stressed, and it was felt that owing to the size of the undertaking, an international conference was necessary.

The proposal is for British Columbia to improve the present highway between Vancouver and Hazelton, carrying it on to the Yukon Territory, for the Dominion Government to build it to the Alaskan boundary and the United States to take it from there to Fairbanks and thence to Valdez at sea level. Following the conference, Premier King intimated he would need further information before committing himself on the matter, but said he would give it his full consideration.

A SHORT LINE FROM WINNIPEG TO HUDSON BAY

Ottawa, Ont.—The report of the engineers of the Canadian National Railways who have been surveying a short line from Winnipeg to Hudson Bay will be strongly in favor of the extension of the line now running north between Lakes Winnipeg and Manitoba to contact with the Hudson Bay Railway.

This information was received from Montreal recently. The report is not yet completed and will not reach the hands of Hon. C. A. Dunning, Minister of Railways and Canals, for several weeks.

The engineers, it is understood, will not only favor this central line to the north because it would clip hundreds of miles off the present rail distance between Winnipeg and Churchill, but they will point out another vital factor in Winnipeg's northern railway facilities. This factor will be the desirability of providing an air line from Winnipeg to the mining fields of Northern Manitoba.

The central line could be run northward in two ways. It could proceed along the shortest possible line to connect with the Hudson Bay road, which would carry it almost due north, or it could proceed north along the narrow strip of land between Lake Winnipegosis and Cedar Lake, finally to make contact with the Hudson Bay Railway about opposite the present branch lines running to Flin Flon and Sherburne.

This would give a short line to the bay and also an air line to the mineral developments. The cost of extending the central road in either direction would be approximately \$8,000,000. It must be understood in regard to this report, that the Federal Government is not committed to build such a line of railway. This inquiry was made because the Manitoba members of parliament requested Mr. Dunning to assist them in this matter. Mr. Dunning agreed, on the express condition that it be understood that the government would not be committed to make any expenditures on construction.

Drums for Highlanders

This handsome set of drums has been presented to the 48th Highlanders Regiment, of Toronto, and is the gift of Lieutenant F. M. Ross. The regiment is allied with the world-famous "Gladys Gordons" and upon its flags are inscribed many of the honors, prominent among them being Ypres, Festubert, Somme 1918, Vimy Ridge, Hill 70, Amiens, Canal du Nord, etc. The regiment was organized in 1891.

The drums were made in London, England, and were shipped to this country by the Canadian Pacific Express Company on S.S. Duchess of York.

LATE MINISTER OF FINANCE

Hon. James A. Robb, Minister of Finance in the Dominion Government, who died at Toronto, following a stroke of apoplexy, Mr. Robb was 70 years of age.

British Ambassador

To Russia Appointed

Sir Edmund Hovey Has Been Transferred From Mexico

London, Eng.—Parliament having approved exemption of diplomatic relations with Russia, the government is losing no time in fully restoring the breach caused in 1927. The appointment of Sir Edmund Hovey as British ambassador to Russia has been announced. A Russian minister will simultaneously come to London.

Sir Edmund has been British ambassador to Mexico for the last four years. He became a diplomatic attaché in 1902, and was appointed to Stockholm in 1904. Shortly afterward he went to Tangier, and in 1906 to Paris.

Later Sir Edmund served in the British diplomatic service in Florida, Cuba, Jamaica, and Persia. Mexico City—Official announcement was made here that John Edmund St. John De Bonnaire Monson has been named British ambassador to Mexico, succeeding Sir Edmund Hovey, who will become ambassador to Russia. The new ambassador has been in diplomatic service in Turkey, Japan, France, Persia and Colombia.

Apple Shortage In States

Forty-Five Million Bushels Below Average Is Report

Washington, D.C.—The apple crop in the United States this year is short and the "apple a day" slogan may be suspended temporarily. Compared with that of last year, it is off 23 per cent. and 45,000,000 bushels below the average. Seab damage in the east and worm injury in the west have resulted in an inferior quality. Prices have already advanced and promise to be 25 per cent. above a year ago.

Gives Up Long Search

Seattle—Refusing to believe that his wife, two little girls and his baby son from whom he was separated in the San Francisco earthquake, were dead, a Vancouver man has just ended his 23-year search here in despair. The story was unfolded when the modern Enoch Arden said that he had remarried after searching vainly for his wife and children along the Pacific coast.

First To Respond

Geneva.—Great Britain, the first country to answer, has accepted an invitation from the League of Nations to attend a conference for the establishing of an international tariff treaty. The United States and other non-members have been invited to participate.

Advocates Free Trade

With Great Britain

Proposed Resolution To Be Discussed At Coming Session Of Parliament

Ottawa.—Free trade with Great Britain within five years' time is aimed at in a proposed resolution placed on the order paper of the House of Commons by W. R. Fansher, Progressive, West Mountain. The proposal, which will be discussed at the coming session of parliament, reads:

"Whereas, Great Britain has for many years been Canada's best customer for agricultural products, particularly wheat and wheat products; and,

"Whereas, the tariffs of other countries are so heavily manipulated detrimentally to the exporting of Canadian products, particularly those of agriculture; and,

"Whereas, in international trade it is imperative for any country to buy as much as possible from the country to which she sells, thereby reducing transportation costs to the minimum; and,

"Whereas, for the general good of Canada, we deem it advisable to foster trade with the Mother Country to the fullest extent, thus keeping trade within the Empire;

"Therefore, be it resolved, that in the opinion of this House that every handicap placed on the free operation of the British preference as contained in our draft schedule, be removed, and, further, that the time has come when the British preference should be progressively increased so as to have free trade with the Mother Country within a period of seven years.

Protests Against Exclusion

Chinese Consul Would Like Discrimination Against Nationals

Brockville, Ont.—A suggestion that the present exclusion of Chinese immigration to Canada, was humiliating to Chinese national honor and that the act of 1923 should be amended to permit a small quota of Chinese immigrants to enter Canada annually or else to contract a gentleman's agreement with China, similar to that now in force in the case of Japan, was made before the Rotary Club, by Li Tchuin, Chinese consul-general at Ottawa. He expressed a hope that the Dominion government would soon see its way clear to remove the present discrimination against Chinese nationals and predicted that with such restrictions removed, a tremendous impetus would be given the already increasing Canadian export trade with China.

BANKS TO TAKE ACTION TO EASE CREDIT SITUATION

Montreal.—Reassuring intimation that in the opinion of the banks of Canada, deflation of stock values in the Canadian markets has reached its logical bottom and that the banks are prepared to step in to the breach in the interests of stabilization was forthcoming when the leading banks, acting together, announced here that they would accept 15 per cent. on call loans to brokers on stocks selling over \$30, and 10 per share on issues below that price.

In taking this action to ease the credit position for the brokers the banks will be benefiting a large number of marginal clients, for brokers generally feel that this will enable them to reduce their marginal requirements and preclude the necessity in many cases of seeking out further calls.

The moral effect of this construction action it is anticipated will be even greater in restoring confidence than the actual aid rendered, great as this will be.

Toronto.—Action of Canadian banks in reducing the required margin of safety for loans on stocks was interpreted here by leading brokers and stock exchange officials as a step to stem the present tide of pessimistic dump selling and to place the reassuring hand of high finance on the shoulders of the stock investing public.

C. E. Abbs, president of Toronto Stock Exchange, thought it "a helpful gesture by the bankers, likely to fulfill its apparent intention of inspiring confidence among the public and of having a general reassuring effect."

It will have no effect, however, local opinion felt, toward possible reduction of margin requirements asked of customers by brokers, and brokers will continue to ask the same margin percentage of clients as before.

ATTITUDE TAKEN AS TO ENTRY OF MENNONITES

Information, Ont.—Widespread mis-

information of what has occurred in regard to the proposed movement of 5,000 Mennonites from Russia to Canada, exists in Saskatchewan. Letters received at Ottawa from residents of that province, as well as the language used by various organizations in passing resolutions dealing with the question, indicate that the attitude of the Dominion Government in the matter has not been fully understood.

Hon. Robert Forke said that the Dominion would not put up a cent. toward their passage money or their maintenance in Canada after arrival. Nor would he permit them to enter Canada, unless the Mennonites now in Canada guaranteed to keep them and to prevent them becoming public charges. Insofar as passage money is concerned, it is believed that Canadian Mennonites are prepared to put this up. If it is not put up and the Mennonites themselves have not got it, then they simply cannot come to Canada.

Berlin.—The Communist newspaper the "Red Flag" publishes a confidential letter written on Sept. 9 by Dr. Von Dirksen, German ambassador to Russia, to the foreign office at Berlin. It deals with the position of German peasants, mostly Mennonites, who settled in Russia but are now leaving the Soviet in large numbers and trying mostly to get to Canada.

According to the letter there is no prospect of the Soviet government abandoning its policy of socializing agriculture for the sake of a few hundred thousand German colonists, or for the sake of her relations with Germany. It is officially admitted the letter was stolen and an investigation has been started to discover how it came into the hands of the Communists, who are using it of course, as derogatory to Russia.

Honor Manitoba Citizen

Bronze Portrait Of Late Hon. Thomas Johnson To Be Unveiled In Ireland

Winnipeg.—A bronze portrait of the late Hon. Thomas H. Johnson, former attorney-general of Manitoba, will be unveiled at the celebration next June, in Ireland, of the 1,000th anniversary of the "Athlone," the national parliament of that country. The portrait will be presented by the Manitoba government in recognition of Mr. Johnson's contribution to the progress and development made by the large Icelandic population of the province.

Police Holidays Are Cancelled

Toronto.—All holidays for members of the Toronto police force have been cancelled; beats in all parts of the city shortened and additional men placed on duty as a result of the series of hold-ups which have occurred here in the past week, and the solution of the crime wave is no nearer tonight.

Awarded Nobel Prize

Stockholm.—Professor Owen R. Richardson, of King's College, London, England, was awarded the 1928 Nobel prize in physics. He is a fellow of the Royal Society and is known for his research work in the theory of electrons. The 1929 physics prize was awarded to the Duc De Broglie, of Paris.

Keeping Highways Open

Brandon, Man.—The first start for the season to keep the highways in this district open for travelling was made by the provincial authorities last week when a new snowplow was sent to clean up the road between Souris and Boissevain.

Veteran Journalist Dies

Calgary.—One of the veteran journalists of Western Canada, W. Beaver Jones, for seventeen years on the editorial staff of the Calgary Herald, died at his home here, after a lengthy illness, at the age of 58. He came to Calgary from England.

Work Being Slowed Up

London.—Rt. Hon. A. V. Alexander, first lord of the Admiralty, announced in the House of Commons that work on the naval base at Singapore will be slowed down as much as possible pending the result of the five-power naval conference.

Father Turgeon Is Dead

Vancouver, B.C.—Father Joseph Turgeon, a son of Senator O. Turgeon, of New Brunswick, and brother of Hon. Mr. Justice W. F. A. Turgeon, of the Saskatchewan court of appeal, died here following a lengthy illness.

Saskatoon as Grain Shipping Centre

May Ultimately Occupy Position In Canada Now Held By Buffalo In U.S.

"There is no reason why Saskatoon should not occupy the position to Canadian wheat export that Buffalo holds to wheat export from the United States," said Dr. W. A. Carrothers, of the economics department of Saskatchewan University, commenting on the statement made by E. B. Ramsay that storage at interior terminals would become a big factor in the grain export business.

"Wheat exported from the eastern seaboard of the United States is not chiefly stored at Boston, New York, and Baltimore," he pointed out, "but at Buffalo, whence it may be shipped to any port at which cargo space may be available."

"In the same way wheat stored at Saskatoon, could be forwarded to Churchill, Vancouver or Port William as ocean or lake space and market demand might dictate.

"There is, of course, also the advantage that the railway hauling of grain becomes less of a seasonal rush if only the short haul to Saskatoon or Moose Jaw is required during the harvest season. In any judgment, the suggestion is practical."

An officer of one of the large milling companies in Saskatoon gave the cost of unloading, handling and loading here as two and three-quarter cents per bushel. This might be well worth while, it is believed, as insurance against the risk of tying grain up at Churchill for a long period.

Dr. W. W. Swanson, senior professor of economics at the University of Saskatchewan, who has acted on commissions studying grain export problems, stated:

"The central factor in establishing a storage centre is access to alternate shipping routes. In this respect Vancouver is handicapped in relation to Fort William and Port Arthur, also to Buffalo and Montreal. That explains why prices tend to rule lower at Vancouver than at the other points named."

"It is vital in building up our grain trade by Churchill to take measures that will result in placing grain in storage at such points as will give direct access to Churchill, but at the same time will not limit our power to use alternative routes, otherwise the British and foreign buyers would hold the advantage over our farmers and their marketing organizations."

"For these reasons, Mr. Ramsay's argument appears to me as valid, and Saskatoon should look forward to great development of the storage and shipment of grain. This will also operate in building up the milling industry in Saskatoon and Moose Jaw."

While the United Farmers of Canada, Saskatchewan section, did not wish at short notice to issue any official statement on the subject, individual directors were attracted by the idea of a system that would tend to prevent the car shortage which is an annual source of loss and inconvenience to the farmer.

W. Moss Thresher, former secretary of the United Farmers of Canada, Saskatchewan section, commenting on Mr. Ramsay's view, said, "To my mind there is no question whatever, but that Saskatoon in the no distant future will become what might be termed the Minneapolis from a milling standpoint and from a shipping standpoint—the Buffalo of western Canada."

Continuing, he said: "We who have known the work of E. B. Ramsay in the wheat pool had a high regard for his business sagacity and sound judgment. We are proud to note by his address at Moose Jaw that he brings to his new office as chairman of the Board of Grain Commissioners a splendid vision and foresight of the natural development of grain handling and grain trade routes."

A Pertinent Question

Prof. Platt: And the diploids existed on the earth millions of years before the appearance of man.

Student: Well, if it existed so long before the appearance of man, how do you know that diploids is its right name?

You seldom find the name of the fellow who thinks he's "It" in Who's Who.

"What? Have you had a bite?"
"Yes, you make the fourth."—Buen Humor, Madrid.

Skim Milk and Meal For Calves

Feeding New Milk After Four Months Is Considered Extravagant Practice

After calves are four months of age it is no longer necessary to feed them on new milk. Indeed, it is a very extravagant practice to do so. In an experiment conducted at the Rothbarth, Sask., experimental station three calves were fed on different feeds from the time they were four months until they had reached six months of age. One calf received 20 pounds of skim milk and 3 pounds of chop, the second received 10 pounds of new milk, 10 pounds of skim milk, and 3 pounds of chop per day, and the third calf received 20 pounds of new milk, and 3 pounds of chop per day. The chop mixture consisted of the following: 300 pounds each of bran and oat chop, 150 pounds of barley chop, and 200 pounds of olive meal.

The calves differed little in weight at the beginning and at the end of the experiment, but the cost of the gains made was very much in favor of the skim milk and meal ration. In the report of the station for 1928, published by the Department of Agriculture at Ottawa, it is shown that the calf getting skim milk and meal put on weight at the cost of 2.11 cents per pound, the one getting one-half new milk and one-half skim milk with meal cost per pound of gain 7.25 cents, while the third calf receiving new milk and meal put on weight at a cost of more than 14 cents per pound.

This experiment was conducted with bull calves that were well developed and in good flesh when the test began. A similar test was carried on with heifer calves with almost similar results. That is to say, the cost per pound of gain was 2.93 cents for the calf getting skim milk and meal, 4.97 cents for the calf getting new milk and skim milk with meal and 12.98 cents when whole milk was used with the meals. In the case of the heifer calf getting skim milk, it is pointed out in the report that flaxseed jelly was used in addition to the skim milk with meal. This jelly was made by soaking 6 pounds of flaxseed in water and the mass heated up. Water was then added until a thin jelly was formed. The feeding of this jelly commenced at the rate of one-third cup to ten pounds of skim milk, the amount was gradually increased to one cup full.

Fires Could Be Prevented

Great Majority In Canada Are Cared By Carelessness

The great number of serious fires in Canada in proportion to population is due to the large number of wooden buildings as compared with older countries, and to the climate which requires the heating of buildings for a rather long winter season. But the fact that 70 or 80 per cent. of the fires in which lives are lost are due—as shown by investigations—to neglect and to preventable causes is surely a reflection on the intelligence of the Canadian people. It is a matter of national importance that they should be thoroughly impressed with this needless sacrifice of life and property, and their earnest co-operation enlisted in the prevention of the great majority of fires that would otherwise occur.—Manitoba Free Press.

Canadian Animals For Foreign Zoological Gardens

Buffalo and Beaver Sent To Belgium and South Africa

So that the people in Belgium and South Africa may become better acquainted with the natural history of Canada, three buffalo and one pair of beaver from Walworth, Alta., passed through Winnipeg recently, en route to Montreal for shipment to these countries for zoological purposes. One of the buffaloes and the pair of beaver are for the zoological gardens at Antwerp, Belgium, while the remaining buffalo are to be placed in the zoo at Johannesburg, South Africa.

The Perfect Host

One summer, Reginald and his three sisters went to visit a relative in Maine. Though it was understood the visit was to consume three weeks, their stay lengthened to two months. "Well," asked the father on the return of his offspring, "was your Uncle William glad to see you?" "Was he?" reiterated the boy, as though surprised by the query. "He asked me why we didn't bring you, mother, the cook, the maid, and the dog!"

In West Australian deserts there are wells which yield water only at night.

In Germany there are more than 460,000 motorcycles.

FRED V. SEIBERT

National Resources Development

Fred V. Seibert Is Appointed By Canadian National Railways To Important Position

Announcement has been made by W. J. Black, Director of Colonization, Agriculture and Natural Resources for the Canadian National Railways, of the appointment of Fred V. Seibert, formerly of the Federal Mines Branch, at Ottawa, and one of the best informed authorities on the natural resources of Canada, to the position of Superintendent of Natural Resources for the Canadian National Railways, with jurisdiction over the Provinces of Manitoba and Saskatchewan.

Fred Seibert's name is known throughout Canada in connection with natural resources development. He has been near Edmonton, Alta., and is a graduate of Toronto University. He was for some years in the surveys branch of the Department of the Interior, at Ottawa, and spent a number of years with the natural resources intelligence service under F. C. Lynch, at Ottawa, during which time he prepared much valuable material on the resources of western Canada.

Later he has been with the mines branch, at Ottawa, as inspector of mines. In his new position with the Canadian National Railways, Mr. Seibert will have his headquarters at Winnipeg.

"Mr. Seibert's appointment has been made in view of the rapid development of the mineral resources in Manitoba and Saskatchewan," stated Dr. Black, "and we feel that in Mr. Seibert we have a man thoroughly conversant with that development, and with the possibilities in the regions now being opened up."

Clerks Must Sing

A German department storekeeper in Smyrna, Turkey, in Asia, makes all the help sing. They must sing, from the counter girl to the floor-walker, even if there is only one customer in the store. The salesgirl must sing while she is waiting on the customer. She can only stop to give the price of the goods or to answer a question. It is catching. During the busy hours singing captivates even the customers.

The Pacific Ocean is composed of approximately 68,634,000 square miles.

Enough telephone wires are used in New York city to reach thirty-five times to the moon.

MADAME CURIE AND PRESIDENT HOOVER

Madame Curie, co-discoverer of radium, with President Hoover, of the United States, who presented Madame Curie with \$50,000 to carry on research work.

The Lady's Chickens

A Striking Example Of Willing Sacrifice For A Worthy Cause

An old lady in Alberta, whose family had been reared and had married and gone, lived alone with her few possessions, chief of which were two or three chickens. This good soul felt within her the urge to do something for the Red Cross of her province, for the great work amongst the crippled and sick children touched her deeply. Unfortunately, there was no money available to send as her donation. It seemed as if she must do her part, and long she pondered what there was in her humble home that she could give away. Taking pen and paper, and with much labour expressing herself in a letter, for she had not the pen of a ready writer, this old woman offered to send the Society her three live chickens. Red Cross could sell them, she thought, and that would be her own contribution.

Much touched by this simple act of charity, the Commissioner wrote suggesting that she should keep them, for surely her own need was acute. Again a painfully written epistle reached the head office, and attached to it was a piece of blue—the fragment of one of her old gowns. Carefully wrapped within, as with great care guarding her one jewel, lay a small Red Cross Pin. This was the one souvenir of the busy war-time Red Cross when she had been a faithful worker and had worn the badge of service, a badge she was now straining every nerve to live up to. As her only possible way of giving, she asked that the Red Cross sell the pin and put the money into the funds.

Such an offering reminds one of the sacred gift of water from the well of David, which had been obtained after much sacrifice. The story of the chickens and the pin reveals that there are hearts of gold beneath the poorest exterior.

Linguist Makes Money

Chicago Hotel Furnishes Service In Thirty-Six Languages

Because many professional men of high standing in their native lands are reduced to dish washing and pantry service, during the period of adjustment in America, the Drake Hotel boasts an interesting service competent in 36 languages.

"Tickets in the card-index of the maître d'hôtel, are the linguistic accomplishments of his subordinates. Reference to this index furnishes an interpreter for the financier from Argentina, or a resourceful courier for his wife, should she wish to shop while her husband is engaged in Le Salle Street."

During the Eucharistic Congress, in 1925, the hotel staff was called on to use 25 languages.

Her Mistake

Judge—"You didn't smothering the chair on your husband's head."

Accused—"It was not my intention."

Judge—"You did not want to strike your husband?"

Accused—"Yes—but I did not want to break the chair!"

In Japan automobiles have to be illuminated inside as well as out at sunset.

The chief vocal organ is the larynx rather than the tongue.

The Care Of The Teeth

It Should Be Remembered That A Clean Tooth Never Aches

When considering the care of the teeth, remember the paint association's slogan—"Save the surface and you save all."

Nature provides us with a very valuable set of instruments for the purpose of grinding our food into small particles ready to pass into the stomach. If our teeth are not as strong and healthy as they should be, the food will not be prepared and our stomach will always be worked too hard and eventually will give us endless trouble. On the other hand if our teeth are dirty, the food will rub off some of the dirt and will carry it into our system. In other words, neglecting to clean the teeth thoroughly is just one form of taking poison.

A tooth is divided into two parts, called the crown and the root. The crown is the wide part which we can see, and the root is the part which is hidden in the gums, pointed part which is in the gums, and has a cover which is called cementum.

Beneath the enamel and cementum in the tooth is a layer, not unlike bone, which is called dentine. The centre of the tooth is called the pulp chamber and contains blood vessels and nerves.

It is a clean tooth that never aches. The first thing that happens to a tooth which is heading for trouble, is that dirt collects on the outside of the tooth. Unless that dirt is removed it will start decay and work into the centre of the tooth. The decay cuts through the enamel and into the dentine. Because the dentine is softer, the decay always spreads in the dentine so that there is more decay inside the tooth than there is on the outside.

A dentist, if he knows about it in time, can prevent further trouble. He can easily and the little holes with his explorer, cut away the decayed part and fill the hole. It is a very simple thing to do, when the decay is just starting, but sometimes it becomes a very difficult and expensive thing to do because people delay too long in seeing the dentist.

If the tooth is not filled right away, the enamel will gradually break down and the hole will become large enough to collect food, which rots and causes toothache. Here are some of the troubles that can come as well as the toothache: rheumatism, neuritis, neuritis, heart trouble, abscess, skin troubles, colds and boils and nervous troubles. And it will pay more than enough to compensate you for your trouble—if good care is taken of your teeth in between visits to the dentist.

The most important thing you can do is to brush your teeth regularly after each meal and before going to bed. The business of brushing the teeth thoroughly takes two minutes. The tooth brush should be small because a small tooth brush can be moved around more easily and more rapidly than a large one. Brushing should be light and rapid and it should be borne in mind that there are five sides to each tooth to be brushed. There is the outside—nearest the cheek, the inside—nearest the tongue, the top—that surface that cuts the food, and the two sides between the teeth.

The tooth brush should move in circles, on the outside of the gums and teeth. Do not forget the gums, because they must be brushed too. The circulation of the blood in the gums is a matter of supreme importance to the health of the teeth. Brush them softly, but thoroughly. If you should have any trouble with bleeding gums, it is advisable to go to the dentist at once.

Count the number of strokes which you take when brushing your teeth. Move the brush around in a circle on the outside of the teeth and gums sixteen times for each side and front, making two strokes of the brush for each count you make, brush the inside of the teeth—that is, the surface toward the tongue—by moving the brush straight in and out. This is also the way to brush the tops, that is, the part that grinds the food.

One of the most beautiful habits after you have brushed your teeth in the morning is to rinse them with lime water. The lime water should be kept in the mouth for about a minute and then forced out between the teeth.

Bananas, oranges, grapefruit, pimentos, ginger, coconuts and other West Indies products were included in a heavy cargo brought to Montreal by the R.M.S. Lady Somers, of the Canadian National Steamships' West Indies passenger service.

Mr. Everest, in the Himalayas, the highest mountain in the world, has an altitude of 29,002 feet.

It is assumed that radium is present in the sun.

An Example To The World

The Undeclared Boundary Line Between Canada and United States Offers Striking Lesson

What was referred to by a great Canadian editor of a decade or two ago, in addresses throughout the United States and Canada, as "the North American Ideal," and what formed the subject of the last public speech of President Warren G. Harding, of the United States—the address given in Stanley Park, Vancouver, when an American President stood for the first time on Canadian soil—has been held up to the people of China and Russia, in their dispute over Manchuria, as a model in international relations and as a safe means of avoiding conflict.

Hon. N. W. Rowell, former President of the Privy Council of Canada, and chairman of the Canadian delegation to the Institute of Pacific Relations, both in Japan, depicted the significance of the undeclared 4,000-mile boundary line between Canada and the United States in the same eloquent and impressive fashion as he has done in past years as a Canadian delegate to the League of Nations.

There is no doubt that the absence of armies, Royal navies, and forts, and other equipment of war along the Canadian-American boundary has contributed to the peaceable and amicable settlement of the numerous disputes that have developed between these two countries in the past century. Both Europe and Asia, where nations have been wont to leap at each other's throats on slight provocation, should profit by this Canadian-American example of friendship and trust between nations. Hon. Mr. Rowell does well to drive this lesson home in various parts of the world as opportunity offers. It is a situation that can well stand reiteration, as an achievement and example outstanding in human history.—Hegina Leader.

Bees Serve Gardens

Useful Action In Transferring Pollen From One Blossom To Another

The primary object of keeping bees is to secure from them a crop of honey, but this is not all that may be gained through them. Bees secure their living and a surplus crop of honey for their owner almost entirely from flowers. Because of this fact, they are of economic importance to the producers of seed and fruit, as well as to the beekeeper. A crop of fruit cannot be obtained unless the blossoms are first become fertilized, and this is accomplished by transferring pollen from one blossom to another.

It has been proved that most of the fruit-bearing trees or bushes are either self sterile or incompatible to their own pollen and that all of them will yield better crops when crossed with pollen from some other variety. It has also been proved that wind plays little or no part in the distribution of fruit pollen, but that insects are the most effective agents for this purpose. Some experimental work done with plums at the Central Experimental Farm, Ottawa, showed that when insects were excluded from the trees during the blossoming period, no fruit was obtained, but where honey bees had access to the flowers, a good crop was secured.

Wild bees are also effective pollinating agents, but their numbers cannot be controlled; a severe winter may reduce their numbers considerably, but honey bees being wintered over in colonies and capable of being moved from place to place may be distributed through the orchards as desired. It is a common practice in some countries for fruit growers, who are not bee-keepers themselves, to hire colonies from some bee-keeper during the blossoming period, knowing that the presence of bees in their orchards increases the possibilities for a better crop of fruit.—C. B. Goodrich, Dominion Apiarist.

Bogs are the natural home of all insect-eating plants.

More than 600 treaties have been filed with the League of Nations.

"What are you doing on the railway line?"
"I am tired of life."
"But it is a disused line."
"Yes, but I am practising."—Il Travaio, Rome.

International Conference To Simplify The Calendar Is Expected To Be Held Next Year

Action taken by the Assembly of the League of Nations at its recent session holds much promise that an international conference to simplify the calendar will be held next year, said George Eastman, chairman of the National Committee on Calendar Simplification, in a statement commenting upon advice he has just received from Geneva.

Mr. Eastman said that a resolution had been adopted by the Assembly which automatically placed on the agenda of the next meeting of the League Conference on Communications and Transit, probably in December, the findings of his committee, the calendar reform resolutions of the International Chamber of Commerce, the recommendations of the French and Belgian calendar committees, and resolutions adopted by various national and international bodies, all directed to the League.

The Communications and Transit Conference, Mr. Eastman said, will in effect act for the League in the matter of calling an international calendar conference and it was his belief that the accumulation of favorable recommendations from different countries, and those of the International Chamber of Commerce could not but impress the conference that the time for international action on calendar reform is ripe.

Before this meeting is held, reports may be received also, he said, from national calendar committees in Germany, Holland, Hungary and Peru, Cuba and several other of the Latin-American countries. The conference will also have been informed of the results of the calendar referendum of the United States Chamber of Commerce, now in progress among local chambers, which calls for opinion on calendar simplification and whether there should be an international conference in which the United States should participate. Mr. Eastman felt that judging by the number of favorable expressions already given by Chambers of Commerce to his committee during its own inquiry the referendum would show approval of calendar simplification.

Camouflaged Sardines

Fish Must Be Correctly Labelled If Sold In Great Britain

The description "sardine" may be applied in Canada to certain fish caught there and it is even permissible when they are shipped to most parts of the British Empire. But if the product is sent to Britain and South Africa, the term is not allowed. This unusual information was elicited when a questioner in the British House of Commons asked the reason for this discrimination against Canadian produce.

Hon. W. R. Smith, parliamentary secretary to the Board of Trade, replied the courts in Britain had decided the name "sardine" could not legally be applied to fish not really sardines. The produce may be sold, but "sardine" must be omitted from the wrapper. Other countries besides Canada are subject to this restriction.

Finland To Have Navy

Finland, it is understood, has started creation of her first navy. Two cruisers of 4,000 tons each and four submarines and four torpedo boats are under construction. Two of the torpedo boats are being built in England.

On a few occasions the northern lights have been seen as far south as Mexico City.

The tongue of a seventy-foot whale has been known to yield as much as a ton of oil.

He: "Whatever I say goes."
She: "Then talk to yourself awhile."

"You look in better health than when I saw you last. Where have you been?"
"In prison."—Moustique, Charlier.

W. N. O. 1812

Does Not Envy France

Germany Sees Advantage In Having Small Army To Support

Out of her home population of 61,000,000, France keeps 413,000 young men constantly in Northern Africa, a white army of 60,000 men, in addition to 11,000 coloured troops. In their new frame of mind the Germans look on these forces with complacency. They involve the French Government in huge annual expense, and they entail the withdrawal of a large proportion of the man-power of the nation from productive work. Sixty-five million Germans, with an army limited to 100,000 men, are clearly in a much more advantageous position than the French for the development of their country's trade and manufactures. They would not have conscription even if the Peace Treaty permitted it. After ten years of freedom from the burden of military service the whole nation would revolt against the bare idea.

(By Annebelle Worthington)

A black crepe satin showing smart lingerie touch in semi lace collar and deep turn-back cuffs. The double circular tiers of skirt add graceful movement and width to hem, with hips slenderly fitted by wide girle caught at center-front with buckle.

The molded bodice is slightly bloused. Style No. 2797 is designed in sizes 16, 18 years, 36, 38 and 42 inches bust, and is the most simple dress imaginable to make.

It is very effective too in black transparent velvet self-trimmed, and will answer many daytime and informal evening occasions. Printed rayon silk crepe in tweed pattern in dark red tones is very smart and so entirely wearable.

Canton crepe in bottle green self-trimmed is another choice for serviceable wear. Army blue crepe de chine with collar and cuffs in eggshell shade is choice of college miss and business woman, as it presents such a neat smart appearance.

Printed transparent velvet in wine red tones and dahlia purple plain sheer velvet are fascinating combinations.

Wool crepe, crepe Elizabeth and flat silk crepe are very fashionable fabrics that adapt themselves charmingly to this model.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department, The New Fall and Winter Fashion Magazine is 15 cents, but only 10 cents when ordered with a pattern.

Work Of The Illustration Stations

Useful Purpose Is Served In The Interests Of Agriculture

Illustration stations operated as a part of the Experimental Farms System, are serving a useful purpose in the production and distribution of improved seed and poultry. In the report of the stations for 1928, published by the Department of Agriculture, at Ottawa, it is shown that one station operator sold seed of improved varieties to thirty-five individual farmers, and that almost 11,000 bushels were distributed in this way from the Alberta stations that year. From one Alberta station there were sold 1,200 eggs from winter laying birds for hatching purposes, and from all illustration stations in the province almost 4,000 eggs were sold for hatching in the spring of 1928.

According to this report rapid progress is being made in the more general use of advanced farm machinery. In 1928, it was pointed out, two combine harvesters were sold in the province of Manitoba. Two years later 208 were in use in the province. A questionnaire sent by the chief supervisor of the illustration stations to the majority of owners of combines brought replies that indicate satisfaction with these machines. The auto truck is also said to be coming into fairly general use as a means of hauling grain.

In British Columbia the illustration stations are encouraging the growing of clover and alfalfa. When the illustration work was undertaken in the Pacific provinces, the crop surveyed showed less than two acres of alfalfa along the line of the Canadian National Railways. Test plots were set up at the stations and these were extended to demonstration blocks under field conditions. The acreage sown to this crop has increased greatly up to 1928. The clover acreage has also increased particularly throughout central British Columbia, there being now thousands of pounds of clover sheared in certain of the districts in which the stations have given attention to this crop.

"What kind of a radio have you got?"

"The railroad type—whistles at every station."

One way to put money into circulation is to take it to the race-track.

Dairy Cow Efficient Food Producer

Properly built stalls eat down work and bacteria.

With increasing rentals and values of farm lands, dairy farming is rapidly replacing other types of livestock farming. A dairy cow producing 8,000 pounds of milk a year furnishes 1,000 pounds of dry matter, all of which is edible and digestible. A two year old steer weighing between 1,200 and 1,300 pounds furnishes about 550 pounds of dry matter, not all of which can be used for food. In other words a fairly good producing dairy cow furnishes twice as much edible dry matter in one year as a good two year old steer when he is killed for meat. A cow can be kept for additional years of service, while to replace the steer, another animal must be fed for a period of two years.

The annual consumption of milk per capita has increased in Canada from 24½ gallons in 1921, to over 52 gallons in 1928. These figures refer only to those who buy their milk and include all forms of consumption.

With growing acceptance of milk as a food has come an increasing knowledge of the proper care of milk on the farm. Because odors from foods and animals in the cow stable are easily taken up by milk, injuring its flavor, they must not come in contact with the milk. Removal of the milk from the stable as soon as possible reduces the amount of dust and dirt entering, and keeps down the bacterial growth in the milk.

Bacteria increase rapidly in warm milk causing it to sour quickly. Removal of the animal heat from freshly drawn milk by lowering the temperature to that of cold well water (approximately 60 degrees Fahrenheit), greatly aids in preventing bacterial growth. A well lighted, well ventilated milk house, not too close to the stable, is also very helpful.

Cleanliness in the stable is vitally necessary. The stall platform should be just long enough for the cow to stand comfortably without room to spare; otherwise, the cow will become dirty from droppings when she lies down. The gutter should be wide and deep. A good gutter is 16 inches to 18 inches in width and 9 or 10 inches below the platform. Bedding should be clean and plentiful.

Long hair on the flanks, udders and tail above the switch of the dairy cow should be removed at regular intervals. Removing this long hair, removes the clinging places of dirt which otherwise will fall into the milk pail in quantities. Keeping the hair short on these parts of the cow permits cleaning in much less time and more thoroughly. Brushing should never be neglected. It removes loose particles sticking to the body. When the hair is short, wiping the udders with a damp cloth, just before milking, is an easy and important aid in securing clean milk.

It is generally recognized that most of the bacteria found in milk finds its source in dirt clinging to the cow and falling into the milk pail during milking time. Simple precautions will practically eliminate this source of bacterial growth and dairymen find themselves well repaid for the little time necessary in taking such precautions.

ATTENDED NOTABLE FUNCTION

Major John MacGregor, V.C., M.C., D.C.M., of Powell River, B.C., was 100 miles away from a railway in a British Columbia construction camp when he heard by radio of the Prince of Wales' dinner for Victoria Cross holders. By making close connections he was able to reach London in time to attend the dinner.

Reindeer For Northern Manitoba

Will Drive Herd Of About 15,000 Reindeer From Alaska To Churchill District

The Northern Mail, published at The Pas, Man., in a special despatch from Churchill, Manitoba's new seaport, states that "an official of the Dominion Government is in Churchill making arrangements for an immediate drive of a herd of about 15,000 reindeer from Alaska to northern Manitoba."

The official is quoted as stating: "The barren lands of Northern Manitoba is the best possible for the development of the industry on a large scale."

The Northern Mail states that the drive will start some time next spring, according to unofficial reports.

At the present time a drive of a huge herd of reindeer is being made from Alaska to the MacKenzie River basin.

A jealous man is always in love, but is more self-love than anything else.

Agreement Reached Between Canada And United States As To International Air Traffic

Milk In The Nations Health

More Sanitary Methods Of Production And Handling Is Desired

Of all foods used in the family life no other has such a direct relation to the nation's health as milk, and the public are quite within their rights in demanding that the old time dairyman with his careless habits and limited knowledge of sanitation should give way to the better trained, more careful producer.

These ideas are expressed in a concluding word by C. K. Johns and A. G. Lochhead, bacteriologists at the experimental farm, at Ottawa, in their new bulletin "Testing The Producer's Milk for Quality." As a means of reducing to the minimum poor qualities in milk judged from the standpoint of food value, cleanliness, healthfulness and fine flavours, health departments of cities and towns and the large milk handling companies are insisting more and more upon sanitary methods of production and handling, disease-free dairy herds and employees, properly supervised pasteurization of the milk and protection from re-contamination after pasteurization has been given. By giving careful attention to all of these points most of the large cities have almost completely eradicated milk-borne disease. In the smaller communities that are not so far advanced in milk sanitation, where properly pasteurized milk cannot be obtained, this bulletin No. 123, of the Department of Agriculture, at Ottawa, recommends the householders to pasteurize their milk in their own homes.

Trees For Northern Village

Big Shipment Sent From Estevan To Hudson Bay Junction

New buildings, modern conveniences, electrical systems, colorful revues, have carried comfort and happiness to people at The Pas within the past year or so. And hardy Saskatchewan-grown trees are now widening the boundaries of civilization in the trek north of 53. Based on the tracks of prospector and mining man, they have blazed the trail of the pioneer to Hudson Bay Junction, well on the way to Fort Churchill, it was revealed to The Leader-Post in an interview with T. A. Torgeson, managing-director of Prairie Nurseries, Ltd.

Demonstrating their all-climate fortitude, a shipment of trees grown in the Prairie Nurseries fields at Estevan are now lying in underground storage at Hudson Bay Junction, awaiting spring-planting weather. During their journey to the north, they were protected from the bite of sub-Arctic cold by shipping precautions in which heavy grizzly bear wrapping paper and Wisconsin moss were used. Although Prairie Nurseries has each fall, for several years, shipped hundreds of trees into the Peace River country far north of Edmonton, this is the first time that a large consignment has gone into the fast-opening Fort Churchill territory. Another new district was plotted in Prairie Nurseries sales territory last October with the shipment of 500 sturdy Caragana shrubs to Surrey, England. A Calgary representative of the firm was responsible for this unusual sale.

Canadian Fruits Are Best

Climate Conditions Are Conducive To Fine Flavor

The finer natural flavor of Canadian-grown fruits is pretty well recognized the world over. The reason—probably not so generally known—is stated by food chemists and dietitians to lie in the more rigorous Canadian climate and in the character of Canadian soil.

Fruits grown in more southerly countries seek to reflect the lack of climatic contrasts. In Canada, the hot days and cool nights bring the fruits to maturity at a rate which gives them a finer, fuller flavor—a distinctive tang that quickly identifies Canadian fruits.

Measured In Miles

Sausage is measured by the mile at the dinner of the huge hydro-mitrate factory at Rjukan, Norway. At a banquet in honor of the general manager of the plant, 3,000 guests ate 1½ miles of sausage. Other statistics of the dinner showed the following was consumed: 2,000 quarts of beer, 1,000 bottles of liquor, 1,000 pounds of bananas, and 2,200 pounds of potatoes.

Every year China uses 4,000 tons of lilies as food. The flowers are made into a nourishing soup.

The Minister of National Defence announces that an agreement has been arrived at between the governments of Canada and the United States, relative to international traffic by air between the two countries.

This traffic has been regulated since June, 1921, under a provisional agreement reached then. The new agreement supersedes this and provides for its regulation in greater detail. It is reciprocal and covers the admission of civil aircraft registered in one country to the territory of the other. The issuance of pilot's licenses in both countries to nationals of the other and the acceptance of certificates of air-worthiness for aircraft reported from either country to the other is applied to commercial and state aircraft other than those in the military, naval, customs and police service.

Under the Canadian aircraft entering the United States must be registered and passed as airworthy by the Department of National Defence, and must bear the registration letters allotted to it by that department. In the same way aircraft of the United States entering Canada must be registered and passed as airworthy by the United States Department of Commerce, and bear their registration markings. Aircraft desiring to cross the international border must carry aircraft, engine and journey log-books and certificates of registration and air-worthiness. Their pilots must carry licenses issued to them by the Department of National Defence in Canada or the Department of Commerce in the United States.

It also provides that the taking of aerial photographs by the aircraft of one country is not permitted over the territory of the other.

Under the new agreement, aircraft and pilots (including passengers and cargo) by either Canada or the United States may engage in traffic between the two countries, but must not operate commercially between points in the territory of the other state.

The new agreement becomes operative immediately and will continue in force until 90 days notice of desire to terminate it is given by either country, or until it is superseded by a further agreement between the two countries dealing with the same subject, or by enactment of legislation in either country in accordance with the terms of the agreement.

No special permission is now required to cross the border. So long as aircraft are licensed and flown by licensed pilots they may fly from one country to the other, provided the customs and immigration requirements are fully complied with.

New Idea In Advertising

Method Of Fire Insurance Company Is Quite Different

We have all heard the story of how Coty purposely crashed several bottles of his product to the floor in the stores handling the perfume in order to create an odor appeal for the product. A fire insurance company has gone that idea one better; it has impregnated a mailing piece with the odor of burnt wood and drenched water. The copy reads, "When your home smells of burnt wood drenched with water—like the odor you got when you opened this folder—it is probably too late to attend to your fire insurance."

In the three prairie provinces of Canada—Manitoba, Saskatchewan, and Alberta—about 4,000 harvester-combine machines were used this year during the wheat harvest.

If the average man could live his life over again he would probably make a bigger fool of himself than ever.

"On what grounds do you apply for a gun license?"
"I want to go debt collecting."
"You want protection against robbers?"
"No, against the debtors."—Drummer, Berlin.

WORLD HAPPENINGS BRIEFLY TOLD

Russia, which led the world in wheat exports, before the war, now does not produce what it consumes.

Winston Churchill, former chancellor of the exchequer, has been elected lord rector of Edinburgh University.

Thos. Mann, widely known German novelist, whose best known work is "The Magic Mountain," has been awarded this year's Nobel prize for literature.

The Austrian government will shortly appoint a consul-general at Ottawa, Hon. P. C. Larkin, Canadian High Commissioner, was informed by the Austrian minister in London, Baron George Frankenstein.

It is reported that a sheep ranch in Nebraska has bought eighteen sections of land at Ft. Collins, Alberta, along the river, upon which he intends to set out a flock of sheep numbering about 20,000 next spring.

Semyon A. Shestakov, chief pilot of the Russian plane "Land of the Soviet," which flew from Moscow to New York, announced the Odeavik-Im, Soviet Aviation Society, had refused to endorse his proposal to fly across the Atlantic ocean on the homeward trip.

Seized and condemned for illegal fishing in Canadian territorial waters on August 2 last, the United States fishing boat "Olympus" has been reserved for the use of the biological board of Canada, and will be stationed at Departure Bay, B.C., it was announced by H. W. Goggin, marshal in the Victoria admiralty district.

The former Kaiser from his exile at Doorn, has instituted a libel suit against the editor of a Berlin newspaper. The newspaper had said that the army was supplied exclusively with Krupp guns, greatly inferior to those of other firms, because the Kaiser was financially interested in the former Krupp works.

For Automobile Protection

Ohio Penitentiary Inmate Patents New Safety Device

An invention by an Ohio penitentiary prisoner may make automobile theft more difficult than it is at present.

Lawton Hilemann, 22, of Akron, serving a sentence of from seven to 15 years for burglary, has filed with a patent attorney an application for a patent on his dual auto control ignition.

When the motor is stopped, it automatically locks the ignition, steering wheel and starting switch. The mechanism can be enclosed in a box six inches square and four inches high and mounted beneath the dash board.

Started In Small Way

Adolph Gobel, millionaire frankfurter, laid the foundation of his fortune in a little sausage-shop in Brooklyn, near a public school. He fostered a taste among the children for piping hot "pups." The rage spread to adjacent seats of learning. So far into the moneyed road did Herr Gobel travel that his son can afford to play around the waters of New York with a luxurious yacht.

Lemonade was invented in the seventeenth century.

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has been recommended for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

Swine Judging Competition

Sponsored By Agricultural Department of the Canadian National Railways

Robert Hornby and Joe McCollum, young farmers of Armstrong, will represent British Columbia in the Dominion Championship swine judging competition to be held under the auspices of the Agricultural Department of the Canadian National Railways, at the Royal Winter Fair, in Toronto, early in December.

They earned this honor by being awarded the Provincial Championship in the tests among the Canadian National Boys and Girls Swine Clubs of British Columbia. In the finals at Toronto, they will compete with teams from every other Province in Canada, the largest entry since the competition was inaugurated in 1925. Should they win, they will be presented with medals and will become the holders for one year of the trophy awarded by W. D. Robb, vice-president of the Canadian National Railways, and they will have the distinction of being the champion swine breeders and judges of Canada.

The Boys and Girls Swine Clubs were started in 1925, by W. D. Robb, and Dr. W. J. Black, Director of Colonization and Agriculture, for the Canadian National Railways, for the purpose of encouraging mixed farming and improving the quality of swine. All boys and girls under twenty are eligible to form clubs, and the movement has grown from six clubs in the first year, to more than two hundred. Every province is now represented and the competitions can be regarded as truly Dominion-wide.

District competitions are held first and the district winners compete in a Provincial Championship test, and the winners of the latter competition are given a free trip to the Royal Winter Fair at Toronto, and a chance to compete for the Dominion title. So far, Ontario, Manitoba, and Saskatchewan have won the Robb Trophy, one team being two girls.

Recipes For This Week

(By Betty Barclay)

MARMALADE GRIDDLE CAKES

(About 18 cakes)

- 2 cups flour.
- 1 tablespoon baking powder.
- 1 teaspoon salt.
- 3 tablespoons sugar.
- 1 egg.
- 1 1/2 cups milk.
- 3 tablespoons melted butter.
- Orange marmalade.
- Extra sugar.

Mix and sift dry ingredients. Add beaten eggs and milk. Beat thoroughly and add butter. Drop by large spoonfuls on a hot greased griddle. When puffed, full of bubbles and cooked around the edges turn and cook on the other side. Spread cakes with orange marmalade. Roll up like jelly rolls. Sprinkle with sugar and serve at once.

VANILLA RICE PUDDING

- 1 package vanilla junket.
- 1/4 cup maple sugar.
- 1 pint milk.
- 1 cup boiled rice.

Place rice in bottom of desert glasses, sprinkling maple sugar over it. Dissolve junket in lukewarm milk, and pour over rice. Let stand in a warm room until firm, then chill. Any left-overs of cereal, etc., may be used instead of the rice.

French Children Play At Aviation
Aviation has become so popular in France that children are having ground races in miniature airplanes, mounted on three wheels. At Baule, the popular bathing beach, many contests are being held on the sands. One of the planes was labelled "Paris-New York."

Great Britain spends more than \$200,000,000 a year on motor cars.

Gas Supply For Saskatchewan

Eagle Butte Oil Company, At Cypress Hills, May Solve Problem

The prospect of a natural gas supply for the cities of Regina and Moose Jaw, and for towns and villages extending westward as far as Maple Creek, has been brought measurably closer with the announced intention of the Eagle Butte Oil Company to spend in a second well in the centre of the Cypress Hills gas field, about 200 miles west of Regina and close to the Alberta boundary line.

The development of the Cypress Hills gas field is being proceeded with in anticipation of marketing gas in Saskatchewan. According to the findings of government engineers it is believed that the Cypress Hills field offers the closest supply of gas which can be transported to this market. A pipe line from the Cypress Hills would reach the town of Maple Creek first, and then proceed to Moose Jaw and Regina, supplying all towns and cities along intervening route.

The whole problem has been carefully examined by competent engineers and has been pronounced feasible. Independent engineers who have been retained by the City of Regina, after an exhaustive examination of all possible sources of supply, pronounce the operations of the Eagle Butte Oil Company, Limited, as the most likely to result in the development of an adequate supply of gas for the Saskatchewan market.—Free Press.

Flying Taxi Service Planned In England

Planes Being Constructed For Shilling-a-Mile Flying

The first effort of one shilling to let loose a fleet of "flying taxicabs" on the airways of England is announced. It is learned that 100 Desoutter-Cirrus sports coupe 'planes are now under construction at Croydon, the London airport, and that all are intended for taxi service as soon as they are completed.

The 'planes will be stationed at provincial cities and will be made available for rapid connection with the Continental air routes from London, or for transport between English cities and towns.

It is planned to run the planes at the passenger rate of one shilling (about 25 cents) a mile. The 'planes are all three or four seaters, with inclosed cabins.

Another interesting announcement concerning air travel came from the French Air Union, which said that its de Luxe London-Paris 'planes henceforth would make connections with the French air lines to North Africa. The new service brings Algiers within thirty hours of London.

Flw 11,500 Hours

Excellent Work Accomplished By Ontario Protective Air Patrol

To protect the forests of Ontario, one of the province's most valuable assets, the Ontario Government protective air patrol has this year done 850,000 air miles or a total of 11,500 flying hours. This is 5,400 more hours than the total in 1928, and was done without injury to a single member of the personnel engaged or to any of the passengers carried in the 'planes. The forest patrol service covers the vast area of Northern Ontario, from Lake Superior to James Bay, and has many notable exploits to its credit in carrying relief to stranded expeditions and conveying injured or sick persons from outlying posts to hospitals.

Our Embattled Farmers

Through Organization Are Defying the Wheat Buyers Of the Whole World

The embattled farmers of the western Canada wheat pool are defying the wheat buyers of the world markets. Millions of bushels for profit but not a cent for loss! If our Farm Board had more courage and vision, the American farmers would come in the defence—and in the money a little later. It is a refreshing spectacle to see a hundred thousand farmers, secure in their technical market position, calmly waiting for their turn to play.—Wall Street Magazine.

New Sound Film Apparatus

Two young Norwegians have invented a new sound film apparatus which they say will cost one-fifth of that of imported machines, and equal the foreign product in every respect. A machine for the production of sound film has also been invented by them, and they are preparing to film reviews.

There are 3,424 spoken languages in the world.

(By Anabelle Worthington)

A graceful new model with animated hemline achieved through interesting circular fluting of dropping lengths at either side of front and back.

The simple bodice with jabot collar is flattering fashion. Sleeves give darts below elbow. The belt indicates raised waistline, that dates the newness of your frock.

It is an exact copy of the Paris model as interpreted in printed transparent velvet in partridge brown coloring, becoming to most women, and entirely wearable.

Don't hesitate! It's yours for just the cost of the fabric and a few hours of your time.

Style No. 2993 is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

It expresses simple elegance in plain transparent velvet in Royal blue with sapphire crystal buckle fastening belt.

Marron Glace crepe satin with the jabot collar made of the dull surface, black sheer velvet, the jabot collar of deep cerise lace, canton crepe in bottle green and army blue crepe de chine are outstandingly smart.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department, The New Fall and Winter Fashion Magazine is 15 cents, but only 10 cents when ordered with a pattern.

SUNDAY SCHOOL LESSON

NOVEMBER 24

THE HIGHER PATRIOTISM

Golden Text: "He made of one every nation of men to dwell on all the face of the earth."—Acts 17:26. Lesson: The Book of Jonah. Devotional Reading: Isaiah 55:1-7.

Explanations and Comments

A Great Command Disobeyed and Punished, 1:1 to 2:10.—The word of Jehovah came unto Jonah, the son of Amittai, telling him that he ought to go to Nineveh, that great city, and cry against it. Nineveh, the capital of Assyria, was on the Tigris River, 600 miles from the Gulf of Persia.

"The word of Jehovah came unto Jonah. How was there a message out of the sky? As he walked, or slept, or prayed, did these words shape themselves from silence into speech? Augustine heard a voice under the fig-tree, at Milan; Joan of Arc heard voices in the forest of Domremy. We, indeed, have heard no voices. But all of us together have not compassed the boundaries of human experience. It is not wise, especially in these days of wonder in which it is our privilege to live, to deny the possibility of anything. What is impossible is only a matter of time."

"This, however, is true, that the word of the Lord which came to Jonah has come also to a great many other men since Jonah. God is at the time speaking to men. Messages from on high have in all ages and all places been received by men. Whenever we are conscious of an urgent voice which says to us, over and over, 'You ought! You ought!' it is likely that we are listening to the word of God."—George Hodges.

Jonah disobeyed the voice. "Jonah says to himself" the first time, "I know it'll be. After I've erred myself how that Nineveh's to be destroyed, they'll begin to weep, and the Almighty'll change His mind and not destroy them a." It's aye His way gin folk repent. "He's of great kindness and slow to anger, but He should keep His word. He takes no thought on me, and what a fool like I make myself of crying that folk'll be destroyed when they winna be. It seems as though the Almighty'dna ken His ain position to gang back on His word because folk commence to weep. But I'm His servant, and I ken my ain place; I'll no see Him place Him self in wrong position, and I'll no see Him place me in ane neither."—Sandy Scott's Bible Class.

Instead of obeying the voice, Jonah went in the opposite direction, the story tells us. At Joppa he found a ship bound for Tarshish (the Phoenician colony on the southwest coast of Spain, then regarded as the very end of the earth), and went aboard.

God sent a violent storm; the sailors concluded that someone had offended his god, and they cast lots to discover the culprit. The lot fell upon Jonah, who acknowledged his guilt and advised them to throw him overboard. The effort to row back to land unavailing, the sailors prayed to Jehovah, and then reluctantly cast Jonah overboard. The sea ceased from its raging and the sailors offered sacrifice to Jehovah. A great fish swallowed Jonah, and after three days cast him upon dry land.

A Thing Of The Past

Senator Buchanan Says West Does Not Need Harvesters Excursions

Senator W. A. Buchanan, of Lethbridge, Alberta, has declared the arrival of a new era in the agricultural activities of the West. Harvesters' excursions, he says, are a thing of the past. Tractors and other such labor-saving devices are making the Western farmer independent of the extra help he has always needed when his grain is ready for cutting.

Though this may mean the loss to some men in the East of a few weeks' work in the year, the cessation of these trips is not entirely to be regretted. They had several features which made them somewhat undesirable. In the first place, many of the men who went West did so, not to work in the harvest, but to seek their fortune in Western cities, and the result was that the West suffered each year through an influx of unemployed. Even of those who did go on the farms, many were retained on the prairies after their work was done, and added to the overcrowded condition of the cities.

There is another encouraging feature revealed in the senator's remark. The West is coming into her own. Rich in natural resources, she has been man-poor. The fact that there is no longer much need for extra workers shows that she is becoming independent, that she is gathering unto herself a farming population sufficient to carry on.

On the whole, few will regret to see the passing of the excursions.

Centrally Heated

In a new settlement near Duisberg, in Germany, although there are 442 houses, there is only one chimney. All the houses are supplied with heat and hot water from one house, which occupies the middle of the settlement and all cooking is done by gas. Lighting is electric.

Dordom is now regarded as being as detrimental to results in factories and workshops as is fatigue.

Wedding rings were made of agate and iron in ancient Roman times.

Chest Colds Need Direct Treatment

It is an obstinate cold indeed that can resist the direct double action of Vicks. Rubbed on the chest, it acts 2 ways at once:

- (1) Direct to air passages with its healing vapors released by body heat;
- (2) Direct, like a poultice, it "draws out" the soreness.

acts 2 ways at once

World Grain Exhibition

Event To Be Staged In Regina Expected To Be Largest Of Its Kind Ever Held

Official invitations are being sent by the Canadian Government to many countries to attend the World's Grain Exhibition and Conference to be held in Regina, in August, 1932. This exhibition promises to be the largest of its kind ever held. About \$250,000 is to be offered in prize money.

Classes for wheat, oats, barley, rye and other grains and seeds will probably attract growers from all over the world for prizes offered for these classes run from \$500 to \$15,000. For example, hard red spring, hard red winter, soft red winter, and white winter wheat are in the \$15,000 prize class, as is also the class for white, medium or late oats. First prizes run as high as \$2,500, and there are from twenty-six to fifty prizes to a class.

The conference to be held at the same time as the exhibition, will, it is expected, attract the world's greatest experts on agronomy, entomology, farm machinery, etc., who will make some very definite contribution to world knowledge on these important subjects.

Regina, where this promising attraction is to be held, is a very modern city of about 55,000 population, the capital of the province of Saskatchewan and situated in the centre of the greatest grain growing area in the world.

Old Family Album

Photographers Say This Relic Of Former Days Is Coming Back

The old family album, which furnishes the "moderns" with gleeful moments over the appearance of ancestors, is coming back—perhaps to do the same for future generations.

Photographers, meeting in convention here recently, declared bobbed hair and modern styles for women have restored the popularity of photographs, and hence the album is returning. One photographer pointed out that the American public spent \$36,000,000 more on photographs last year than in any year previous. Women's styles make them appear young, he said, and they want a picture record.

The Turk's Clock

Watches and clocks are rare in some parts of Turkey, but the natives have some ingenious modes of telling the time. One is by observing the eyes of a cat. Early in the morning and evening the pupils are round. At certain hours they are oval; at noon they are but a narrow slit.

The Canadian National Exhibition held at Toronto, Ontario, is now in its 51st year. The value of land and buildings connected with the exhibition is \$25,000,000.

The Singing Fool

By HUBERT DAIL
Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrell, the cigarette girl, but he doesn't know it. He married Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend. She and Perry take the child which Al adores and call for Franco. Al completely broken by his tragic loss, disappears from Broadway and becomes a derelict. One day, as he wanders down a back street, he sees Grace Farrell on the opposite corner. He runs away and Grace hastens to Blackie Joe's club to tell him the news.

CHAPTER XXII.

"I just saw someone we both know," Grace began, with a tired, rather set little smile. "Al Stone."

"No?" Blackie put down his cigar. "Where?"

Briefly Grace related the circumstances of their encounter.

Farmers tell WHY they Clip Cows

A CERTAIN farmer wanted the facts about clipping cows, so he wrote us for names of those owning clipping machines.

He wrote them. Now he himself is so pleased with the Stewart Clipping Machine he sent us the letters which made him decide the clipping machine is a good investment.

Here are some of them: "I have been shipping to Borden's Milk Plant regularly for 7 years and during that time I have never had a can of milk returned. I get cleaner milk and find my cows easier to keep clean so for that alone I would say a clipping machine is a good investment."

Billings Bridge. "I always clip mine in the fall. Some half up and others that are inclined to be woolly I clip them all over, as I find they do better and much easier to keep clean, and I sure save the bacteria count and I am sure we get more milk as well. I always get Score 1. I would not be without a clipping machine under any consideration."

Desboro. "We have had a power outage for years and would not do without one. It is a great help. The milk is easier to keep clean and pure. Keeping down milk sure will produce more milk."

HOW TO CLIP COWS

Manure, the principal source of bacteria, comes off and at milking time rub off into the milk. If half on udders, underlines, flanks and tail is kept clipped short all winter.

Lies seem to congregate along the spine, which explains why farmers clip a six-inch width from tail to ears.

Farmers who have warm stables and drinking water inside, usually clip their cows all over.

For a clipping machine and make more money from your cows—with less work. Stewart No. 1 Clipping Machine is easy to use and anyone can do a nice job. It is made of iron. Strong, sturdy, easy-running, and will last for years.

At your dealer, \$12.00. Satisfaction or money refunded.

treme cruelty and desertion. It is understood that Mr. Stone, whose whereabouts are unknown, will not fight the case.

"Among the gossips of the boulevards it is said that as soon as Mrs. Stone's divorce is granted, she will marry John Perry, well known bon vivant of Broadway. The couple are seen together a great deal at the Riviera resorts, where Mrs. Stone's beauty and chic attire have attracted a great deal of favorable attention. On the beach she is frequently accompanied by her baby son, Junior Stone.

"Meanwhile Al Stone's old friends from Broadway are wondering what has become of the former successful song writer. At one time it was said that he, too, had come to France, but this was denied by those in the know."

Al had dropped the paper with a bitter smile. So Molly was charging him with cruelty and desertion! The terrible irony of the accusations dazed him for a moment. And Molly was preparing to marry Perry!

Oh, well, it didn't matter; nothing mattered any more! Let her make any charges she wished to get her freedom. Yet the picture of Junior, on the Riviera beach with his mother, remained with Al for a few days. He wondered if Junior still chattered and laughed as he had in the old days and whether he remembered his daddy?

Al looked down at his shabby clothes. He certainly wouldn't want Junior to see him as he appeared now—the personification of failure. No, Junior must never know what had become of his daddy. Al's pride was strong enough for him to make that decision.

After that Al still studied the newspapers for other items concerning his family, but nothing else appeared. Nor did Molly send any letters. Al had left word that his mail was to be forwarded care of an obscure East S'de bank, where he had placed his money. But every time he called at the bank for additional money, and asked for letters, he found none from Molly. Letters from Marcus and all his old Broadway friends drifted in, but these he quickly tore up without opening them.

Recently he had ceased to read the papers or to ask for letters. His interest in life was dwindling, narrowing down to the smallest circle. Even this interest was passive rather than active—he did not really care about sleeping, dressing, eating, wandering through the streets. It was done simply through habit—his last hold on life. If that passed from him one of these days it meant dark oblivion for the man who had once been light-hearted Al Stone.

Seeing Grace on the street had proved a terribly disturbing shock to him. In running away he had followed his first impulse—but afterward his conscience had bothered him. He knew Grace's feelings would be hurt. After all, Grace had been one of his best pals back in the old days at Blackie Joe's. He remembered her as she had looked then—a startled fawn of a child. She had certainly developed into a stunning girl.

(To Be Continued.)

A Walled-Arabian City. Sanza, a town in the desert of Southwest Araba, is surrounded by a thick wall of rubble and mud, some four miles about, with four principal gates and many tunnels, mostly in ruins. Within this storied Arabian city are forty-eight mosques. In the neighborhood of the Grand Mosque, are the lapidaries who cut the beautiful Yemen stones of quartz and chrysochase known to the outside world.

Furnace Terrified Eskimo

Could Not Understand How the Heat Was Made

May Lee Davis, writing in North American Review, says: Eskimo Muk-pli came to pay her first school call on me in that far Alaskan home I know so many years ago.

"How come?" queried Muk-pli, smuggling close to the register and pointing to the black grated hole in the floor. "How come hot? No see him fire. How come, please?"

Now I felt that the complex magic of a hot air furnace could be better shown than explained, so we descended to our small cellar where an empty crude oil drum had been converted into a miniature furnace. In the dim light and the dented glow from the open draft, shadows flickered and the white asbestos-wrapped pipes, reaching out under the floor to our four small rooms above, stretched aloft in eerie gesture. The little woman caught at my hand in terror.

"Very big devil, him," she whispered. "How you talk him devil? How you make him breath hot?"

"You talk about 30 breaths of wood to him, a winter! He's a hungry thing, but a good little devil." I laughed, reaching up and putting one of the twisted white arms. "See Muk-pli, good devil. If you feed him plenty wood, he makes plenty of hot bread upstairs. Warmers our feet, good and plenty, upstairs."

But she was still clutching tightly to my hand as we went up the short steps.

NERVES WERE BAD

Could Not Sleep
Tired All Day Long

Miss Florence Coutier, Bark Lake, Ont., writes: "I was troubled with nervousness, reaching up and putting one of the twisted white arms. 'See Muk-pli, good devil. If you feed him plenty wood, he makes plenty of hot bread upstairs. Warmers our feet, good and plenty, upstairs.'"

But she was still clutching tightly to my hand as we went up the short steps.

But she was still clutching tightly to my hand as we went up the short steps.

Englishman Invents New Dance Floor

Savoy Hotel, London, England, Has Only One Of Its Kind In World

A dance floor that rises up to the level of the tops of the tables—at the touch of a button—was "opened" during the dinner and supper entertainments at the Savoy Hotel, London, England. It is said to be the only floor of its kind in the world. Measuring 44 feet by 25 feet, it rises without a creak in 30 seconds by means of hydraulic power. Thousands of gallons of water from the four artesian wells below the Savoy are used.

An official of the hotel said: "The inventor is an Englishman, W. J. Huggett, and he and our chief engineer, F. C. Gay, have been working on it for six months. It has cost over \$50,000, and has been constructed between 2 a.m. and 10 a.m. so as not to interfere with our guests' comfort. This enables all guests to see the cabaret without standing.

WHEN YOUR BABY CATCHES A COLD

In spite of all precautions little ones will take cold—especially during the changeable days of our fall season. When the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent more serious complications.

Mothers who keep a box of Baby's Own Tablets in the house always feel safe. In fact they are like having a doctor in the house. They are gentle on the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or sour stomach. They are absolutely safe—being guaranteed to contain no drug at all harmful to even the youngest babe. They cannot possibly do harm—they always do good.

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail for 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Has Interesting History

Small Cinema Was Built For Use Of Royal Family

Across the way from the Royal riding school in the labyrinth of streets between Buckingham Palace-Road and Victoria Station is a small and comparatively new cinema with an interesting history. It was built by Mr. E. C. Lascelles, a cousin of Lord Lascelles, for the use of members of the Royal Family. The cinema is on the site of an old ecclesiastical building, and construction of a subterranean passage was commenced so that the cinema would be directly accessible from Buckingham Palace, but that idea was abandoned.

The first author to use a typewriter in the preparation of manuscript is believed to have been Mark Twain.

Miller's Worm Powders work so effectively that no trace of worms can be found. The pests pass away in the stools without being perceptible. They make an entire clean sweep of the intestines, and nothing in the shape of a worm can find lodgement there when these powders are in operation. Nothing could be more thorough or desirable than their action.

The value of pearl shell raised during ten years off the northwestern shore of Australia was more than \$10,000,000.

Traced Blackmailer By Following Aerial Pigeon

Aerial photography recently thwarted an attempt at blackmail in Germany. A wealthy man received a package containing a carrier pigeon and a letter, which stated that if he did not forward a large sum of money by the pigeon within a given time, he would meet violent death. The pigeon was released and followed by an airplane, and an aerial photograph taken of the place where the bird landed. The house of the offender was easily identified. He was an unemployed miner, from one of the intended victim's mines.

Little Helps For This Week

"Blessed is the man whom Thou chastenest, O Lord, and teachest him out of Thy law."—Psalm xciv. 12.

Do not cheat thy heart, and tell her, "Grief will pass away; Hope for fatter things tomorrow, And forget today."

Tell her, if you will, that sorrow, Need not come in vain. Tell her that the lesson taught her Far outweighs the pain.

—Adelaide Anne Proctor.

It would be a poor result of all our angust and our wrestling, if we won nothing but our old selves at the end of it; if we could return to the same blind loves, the same self-confident blame, the same light thoughts of human suffering, the same frivolous gossip over blighted human lives, the same feeble sense of the Unknown toward which we have sent forth irrepressible cries in our loneliness. Let us rather be thankful that our sorrow lives in us as an indestructible force, only changing its form as forces do, and passing from pain into sympathy.—George Eliot.

An Oil That Is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far ahead enough to attest its excellence, for in all these countries it is on sale and in demand.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy competition an extra charge is made for first week. Reading notices, 10c per count line.

LOCAL ITEMS

Mrs. Amy Meyers on Monday returned from Oyen.

Mrs. Lloyd Robinson and Lois left on Monday night for Madison, Sask., to visit relatives.

Mrs. J. Rennie entertained the Card Club on Tuesday evening. Mrs. A. V. Youell was the winner of a beautiful sugar shaker and syrup jug.

Mrs. N. Murray entertained the Card Club on Tuesday evening of last week. Mrs. M. L. Chapman was the winner of a lovely sandwich plate.

Those who wish to have personal greeting cards printed should give in their order early. We have two fine specimen books. The choice is good and the prices are right.

On Tuesday we had our first reminder that winter was near at hand, the thermometer registering considerably below zero. Saturday night we had our second fall of snow.

Our subscribers have been very good about calling at the office and paying their subscription to The Advance. We still have a few names on our books in arrears. We would appreciate it very much if you would settle this little account immediately.

Heard About Town

A. V. Youell was a Calgary visitor on Sunday.

S. W. Warren and Jas. Ferguson are Edmonton visitors this week.

Call and see Heath's display of coats and dresses at Hurley's on Friday, November 22.

Mrs. P. Begon, infant son and daughter, Loretta, on Saturday returned from Okotoks.

Mr. and Mrs. Cody, of Cere, were guests of Mr. and Mrs. M. L. Chapman on Sunday.

Wm. Leith left on Wednesday of last week for Lacombe, where he plans to spend the winter.

John Milligan, of Carstairs, a former resident of the Chinook district, is visiting relatives here.

Mrs. R. Peyton and daughter, Julia, returned home on Friday from Watertown, South Dakota.

The Acadia Cafe held another successful dance on Saturday evening. These popular events will be continued indefinitely.

Mr. and Mrs. J. G. Connell left for Edmonton Wednesday morning. Mr. Connell will attend the Alberta Hotel Men's Association's annual meeting.

Mrs. C. W. Bassett, of Huxley, her two sons, Clifford and Floyd and daughter, Gertrude, visited at the home of F. Bassett and Mrs. C. Peterson, last week.

Mrs. Ida Platers gave a birthday party in honor of her nephew, Wilbert Myhre, on Saturday afternoon. There were 12 of his chums invited and they had a good time.

Mr. and Mrs. Shielkie, of Acadia Valley, spent the week end at the home of Mr. and Mrs. H. Lloyd. Mr. Shielkie is manager of the Pool elevator at that place.

R. A. Morrison left for Calgary by car on Tuesday evening. He will be the groomsman at the wedding of his chum, Tommy Morrison, on Wednesday, November 20.

Mrs. Stanley Gustin, of Saskatoon, who has been visiting her parents, Mr. and Mrs. E. A. Jacobson, of the Heathdale district, left on Saturday morning for her home. Her mother accompanied her and will visit a few weeks in that city.

Small Advertisements

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two.

WANTED—The news from every part of the Chinook district. Send it in.

FOR SALE—A few more bedsteads, springs and mattresses. Apply The Acadia Hotel. c29-31
